João Paulo Marson

Project & Digital Product Management · Fintech and Payments

São Paulo, Brazil jp@jpmarson.com.br jpmarson.com.br linkedin.com/in/jpmarson

SUMMARY

Project and digital product leader with 16 years of experience, more than 6 of them in fintech. I lead teams on projects and in the operation of digital products across several markets, bringing business, product and engineering teams together. My role is to bring clarity: close the gap between business and technology, read the data and the environment, shape the strategy and make sure everyone sees and follows the same direction. I believe trust comes before process, and that strong results are built as a team. Solid background in agile methods (Scrum, Kanban, LeSS), API integrations, data-driven prioritization and stakeholder management.

PROFESSIONAL EXPERIENCE

Manager, Technical Project Management — Fiserv

Aug 2025 – Present · São Paulo, Brazil

Building, together with the leads of each front, a cross-team project management capability in Brazil, focused on execution, compliance and measurable business impact. I lead three project management groups.

- Regulatory and card scheme compliance across products and operations.
- Delivery and evolution of core products and features.
- Enabling new acquirers through the Acquiring as a Service (AQaaS) platform.
- Project prioritization aligned with business goals, improving delivery predictability and financial return.
- Current focus: operational efficiency, value-driven prioritization, clear metrics, continuous improvement and pragmatic governance — standardize only what scales.

Technical Product Owner — novutech · novücard credit card

Jan 2020 – Jul 2025 · Remote · 5 years 7 months

Technical Product Owner for the novücard credit card, working side by side with business, engineering, data and customer support teams. My role: connect production data to product decisions, run the priority forum between business and technology, and keep the company informed about every delivery so the whole team moved in the same direction.

Team outcomes:

- 40% lower onboarding cost and 30% less onboarding fraud.
- Underwriting response cut from 24 hours to immediate.
- App store rating up from 3.8 to 4.9.
- Full card processor migration delivered in 6 months.
- Over 1,000 fewer support contacts per month.
- 20% increase in physical card activation.

Technical Product Owner — ITS Soluções

Jun 2018 – Jan 2020 · São Paulo · 1 year 8 months

Product Owner for an IT ticket automation SaaS product, uncovering customer pain points and designing solutions together with developers and architects. Also acted as a pre-sales consultant.

- Defined and prioritized features; built the MVP and product roadmap.
- Managed risk to ensure product quality, effective UX and technical feasibility.
- Validated solutions with clients and kept transparent communication through release notes.

EARLIER CAREER

Scrum Master · StratioBD — Digital transformation at Banco Carrefour Brasil: supported two teams in adopting Scrum, with a training track (Scrum, Kanban, MVP, LeSS) and flow KPIs. (Jul 2017 — Jun 2018)

Scrum Master · Nextel Telecomunicações — Defined methodology, processes and best practices for the mobile apps digital area, working with two teams. (Apr 2017 — Jul 2017)

Product Owner / Scrum Master · ITS Soluções — Project management methodology, pre-sales, requirements gathering, user stories, release planning and agile KPIs. (Jun 2015 — 2017)

Project Manager MS Dynamics AX/CRM · AX4B and SAGlobal — ERP and CRM project management: scheduling, scope, milestones, team coordination and client relationship. (2010 — Jun 2015)

Pre-sales and CRM Consultant · Metrics Information System — Mapped commercial processes, implemented and trained Dynamics CRM, and served clients across Latin America. (Aug 2008 — Apr 2010)
